Overview

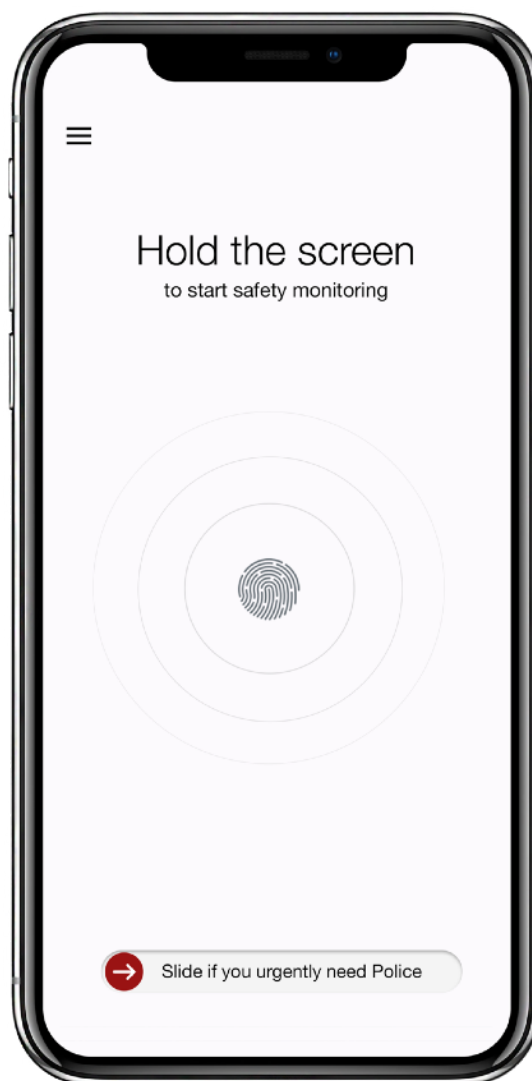

Duress App is designed from the ground up to offer the fastest response in an emergency, whilst being discrete and reliable in every situation.

Duress App uses cutting edge technology to offer world-class security and response in the simplest way, with something you always have on you - your phone.

With Duress App, you can tap the widget, slide the slider, shake your phone or press the bluetooth button and have 24/7 assistance online in seconds.

The App runs on iPhone and Android, utilises GPS tracking, live video streaming and real time notifications to keep you safe across Australia.

Operators and Organisations can contact the user directly through the App via 2 way audio communications, and welfare timers keep your staff protected 24/7.

Duress Emergency™

Duress allows you to instantly start live monitoring, request Police, and stream live video and location.

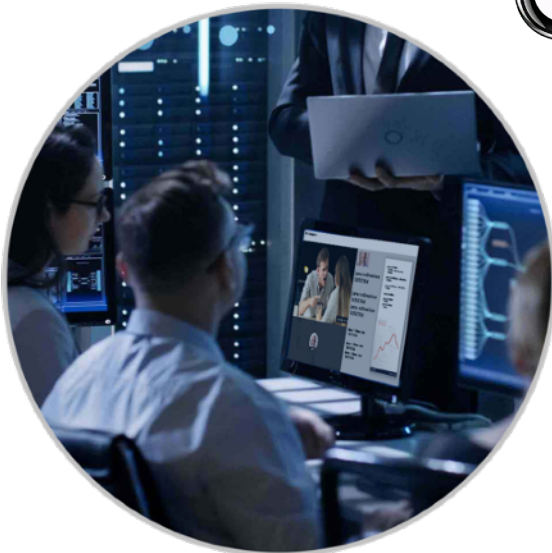

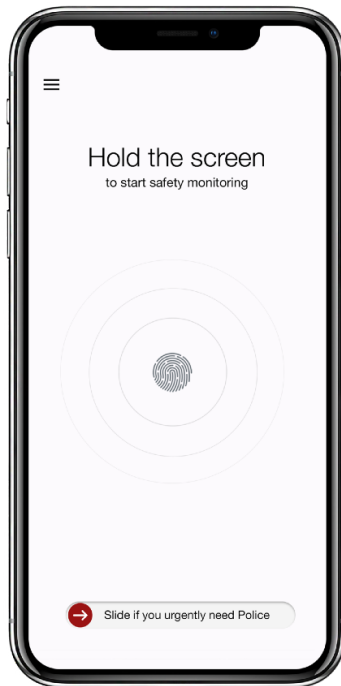

Slide the slider at the bottom of the screen to activate Duress, which will set off a cascade of events across the Duress network. Your phone will begin streaming live video and audio, and begin location tracking.

Real Time Escalation

The Duress Operations Centre will begin monitoring the live video and will escalate to Police in required. Your administrators will receive notifications, including the live video and live location tracking.

In addition, you receive live updates of what is happening during the activation

**Operations Centre
Notified**

**Organisation Admins
Notified**

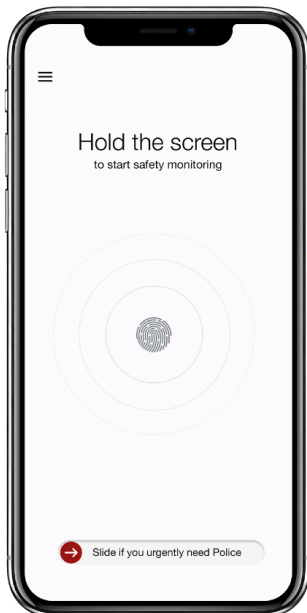

Easy to use

In addition to Slide, there are several ways to request assistance with the Duress App.

Shake - Shake your phone to begin a 5 second countdown, which if not cancelled will go into emergency mode.

Widget - On iPhones, the Duress widget is always available from the lock screen. On Androids, a floating red button is always on the screen for quick escalation.

Protective Monitoring™

If you don't feel safe, but don't need Police, you can begin protective monitoring.

Simply hold anywhere on the screen, or connect your earphones, to prime Duress for activation. If you need to escalate to Police, simply release your phone or remove your earphones.

The app will countdown from 5, and then enter emergency mode.

Real Time Notifications

During an activation, not only is live video, audio, location and profile data sent through to the Duress Operations Centre who can escalate to emergency services, we also notify the nominated people in your organisation. They will receive SMS notifications with every status update, including emergency declared, operators monitoring and police have been requested. We will also notify you if the incident was a false alarm and that we have called the user and confirmed they are safe.

Duress | Card

Duress Card™

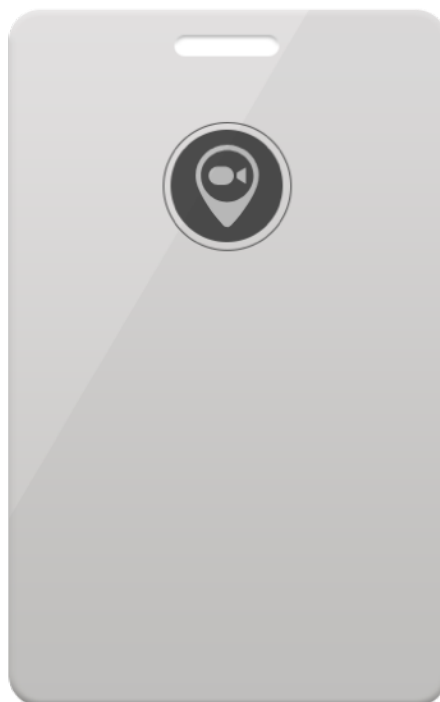

The most advanced, responsive and effective security app in Australia can now be activated remotely.

Duress Card allows you to discretely request assistance from your team, request Police as well as stream live video, audio and location, all with a tap of the card.

Duress Card is paired to your phone, and then in an emergency connects to the Duress Operations Centre (DOC), our A1 ASIAL graded monitoring service, giving you real time protection 24/7, Australia-wide.

Duress Card comes with a silicon case which sticks to your phone, so that one tap assistance is always available.

Duress Card connects to any Android or iOS phone, has a 2 year battery life, and is water, dust and drop proof. The Duress Silicon Case is branded with your organisations logo, and is crafted from an antibacterial polymer.

2 Way Communications

Duress App not only provides instant emergency escalation and one tap activation, but it also runs on a device you already have on you - your phone.

This means emergency service Operators, operators at the Operations Centre, and your nominated staff can all call into the device at anytime, without the need for additional devices.

This speeds up response times and allows Operators to talk directly to the user to confirm they are safe.

In addition, after any activation, your nominated staff receive an SMS confirming the user is safe along with their contact number.

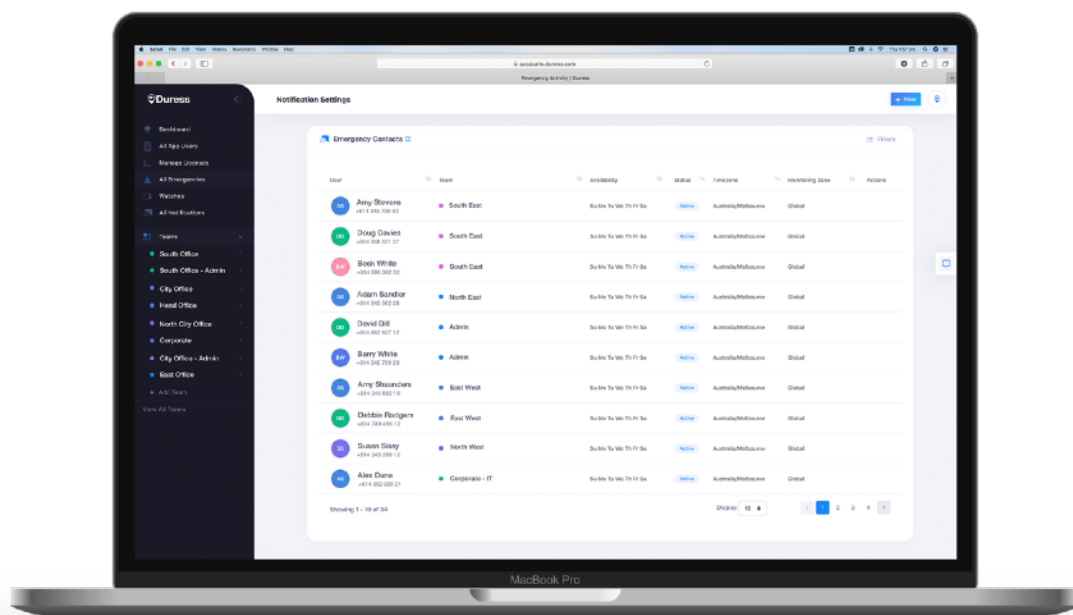

Duress™ App for Organisations

Duress is designed to let an organisation have a full overview of their staff safety all in one easy to use Duress Online Management portal.

Add, edit and remove users, and transfer the app between your staff as needed. Set who is notified of any emergencies at your organisation, and the times they should be notified.

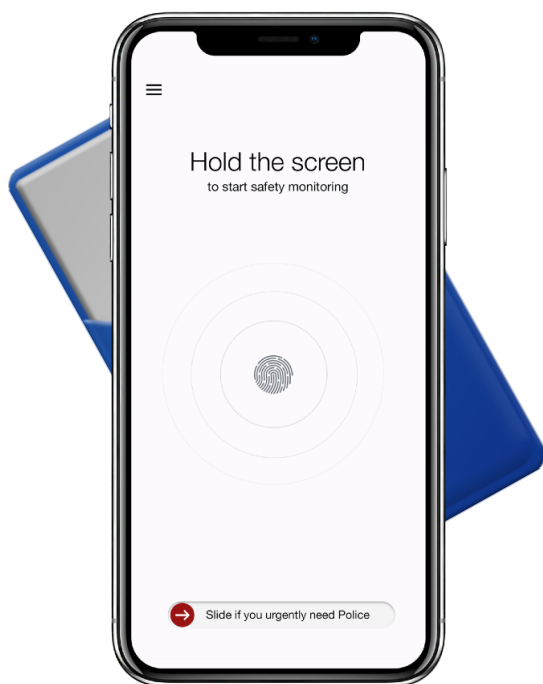

Review any incidents that have occurred, including the video and location data.

Teams from 10 - 1000 have free access to the Duress Management Portal as part of their Duress App subscription.
