

Falcon.TM

The right amount of everything.

Live Streaming Video. Real-time location. Discrete Activation. Fall detection. Periodic Check-ins. Incredible battery life. Internal alerts to your team, and external alerts to our A1 Graded 24/7 monitoring centre. Falcon will transform your teams safety — and it can be deployed in less than an hour. It's all easier than you think.

Safety your staff will love.

Are you OK?

You can choose to set automatic check-ins for all of your team (as often as you like), which not only keeps your staff safe, it makes them feel safer as well. Falcon also features automatic escalation following a missed check in, notifying your nominated people in real time if anything is wrong. Falcons "Are you OK?" is the most used check in system in Australia and NZ.

Takes a Second, Protects for Hours

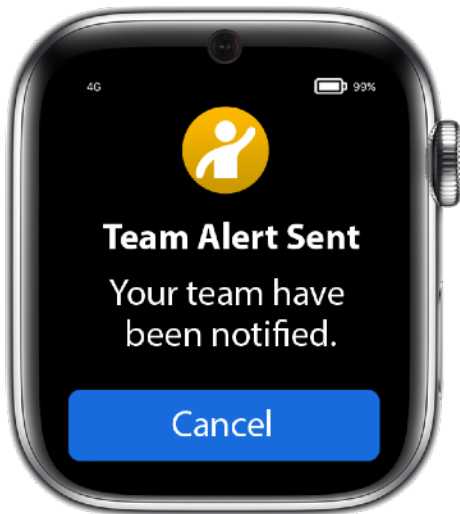

The problem with existing welfare timers is they are clunky to use and hard to set. Falcon allows your team to set a welfare timer in less than a second. Simply drag the orange icon ● on the screen and release. From 20 minutes to 2 hours, your team can indicate when they would like to be checked-in on by Duress. Need to extend the timer? Drag the icon. Want to cancel the timer? Tap Cancel. With Falcon, staying safe has never been quicker.

Fall detected

Using white papers and algorithms from local and international Universities, Falcon has world-leading, built-in Fall detection and escalation. Falcon is constantly analysing movement to detect a slip, trip or fall, and if detected will ask the user to confirm they are safe, before escalating to the Duress Operations Centre.

Request Assistance Internally

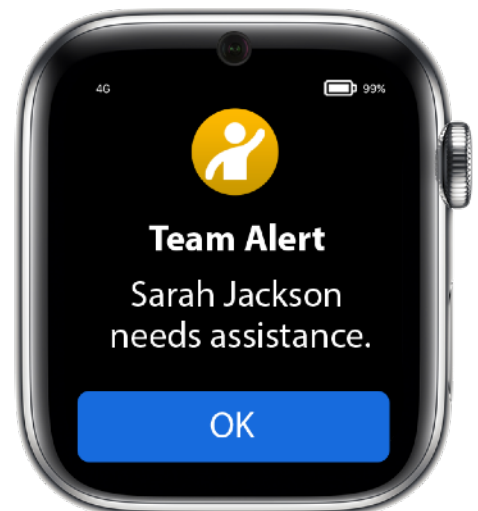

Double tap

Sometimes you just need people to know where you are, or that you need a hand. Tap Falcon twice to notify your team, and they will receive a notification advising that you need some help. No operators, no emergency services, just a quick way to request assistance internally.

Team Communications

When your team receive an internal notification on their phone, it lets them know who needs help. On Falcon, users can just acknowledge the request by tapping "OK". If they need further information, such as what they need help with, then can call that user directly, Falcon to Falcon.

Stay in Touch

Team Alerts don't just go to other Falcons in the team, they can also go to people you nominate via SMS. This includes who is requesting assistance, their live location on a map, and also the ability to call them directly on the Falcon.

A1 Graded (and friendly) Operators are just a tap away.

Emergency

Our Duress Operators have accumulated millions of monitoring hours, helping our clients keep their team safe.

When you declare an emergency, the service works as promised.

When you tap your Falcon three times, Falcon streams live video and audio, location and profile data through to us, where our trained Operators review the video and audio to determine the best action to take.

Our Operators are trained specifically on Falcon, including emergency services escalation and verification, and keep the nominated people in your organisation up to date on the activation status in real time.

We love “Just Trying” & “Just Testing”

With every client we deploy, we look for new ways to help their team utilise their Falcon to its full potential. A big part of this is ensuring everybody feels comfortable activating live monitoring, and we encourage all users to declare an emergency regularly. The live video and audio shows Operators that the user is safe and just testing, and so they will give them a call to confirm, as well as answer any questions they may have.

Built for Australian Organisations of all sizes.

100% Australian

The Duress designed Falcon is years ahead of the competition and delivers performance you can't get with any other safety device. We also design and develop the technology here in Australia. So everything works together beautifully - not just now, but for years to come, with new features and security updates that help keep your Falcon in top form.

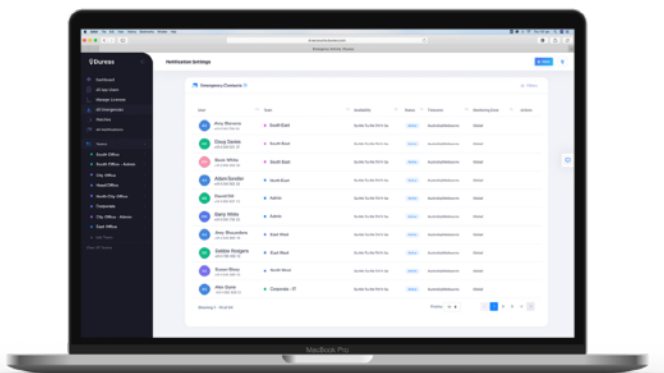

Everything just works

As soon as you turn on your Falcon, it is ready to go. There is no menus, no logins, no setup - Falcon is designed to be simple to use, simple to deploy and simple to manage. If you do want to customise your teams Falcons, such as turning features on and off, you can easily do so from your Duress portal.

Portal for seamless management

If you know another organisation using Falcons, you've probably heard how much easier everything feels. Want to change the logo on the devices? Tap change logo. Want to add someone to receive SMS Notifications? Enter in their number. Need to review an activation? Click it to review the video, location and Operator escalation. The portal is designed to be set and forget, only alerting you when it needs to.

You're in good company.

Falcon is used by local councils and federal departments, local stores and national retailers, schools and universities, manufacturing and mining, hospitals and health.

From single user accounts to deployments of tens of thousands, Falcon is the most advanced, affordable and reliable safety solution. Our clients include:

Pricing.

There is one more reason Falcon is so popular.

Duress Falcon is not only the most advanced safety device, it is also the most affordable. Duress has been **awarded All-of-government pricing**, allowing local, state, federal and commonwealth departments in Australia to receive discounted pricing:

Plays well with others.

Falcon Accessories to help your team take flight.

Falcon Lanyard \$49+GST

Sometimes your team may be unable to wear a Watch, and so the Falcon Lanyard is a strong, lightweight lanyard that can be clipped onto Falcon.

Falcon Dock and Tablet \$645 + GST

Easily charge up to eight Falcons in one place, and if your team will be sharing Falcons, it allows them to sign in and out by tapping their name on the screen.

Deploying Falcon is easy.

Your users. Your admins. You're good.

Our onboarding team securely onboards the stuff you care about — emergency contacts, users, teams, escalations and more Pathfinder, your Duress management portal. We onboard everything in just a few steps, and notify you when you are ready to go.

Australian Support Centre

Whether you want to know more about deploying, or get a hand setting up your Falcons, or your team have questions, we've got real people ready to help. You or your team can call a specialist, chat online, or visit us in person at our support centre.

Training

Our in-person and online training lets you get your team comfortable before, during and after deployment, allowing everyone to ask questions, activate emergencies, talk to operators and more.

Unlimited Solutions

Duress is used by thousands of organisations across Australia, and we learn from each and every one on how to best provide solutions to their issues. Can't wear a Watch? Falcon can be worn as a lanyard. Need to share Falcons between users? We have a Falcon sharing station. Need to connect Falcon to Wifi, use single sign on, or upload safety reports monthly? Yes, yes and yes.

Meet the team

Falcon is part of the Duress family, and so is easily managed via the Duress portal. The portal is your home for managing your users, reviewing any incidents, accessing reports, nominating who should be notified during an emergency and more. The Duress Portal manages all of your Duress Falcons, Duress Apps, Duress Buttons, and Duress Satellite. And it's really easy to use.
